SAFETY MUST BE YOUR FIRST PRIORITY WITH THIS PRODUCT

MODEL: HEH01314
20’ STICK LADDER

- Always Wear a Safety Harness with this Product
- Practice Using at Ground Level
- Weight Limit: 300 lbs.
- Tree Size: 9”-18” diameter

Instruction and Safety Manual

F I E L D & S T R E A M

WARNING

Every year serious injury and death can occur from hunting related accidents. To ensure your safety, please COMPLETELY read and follow this safety manual and ALL warning labels BEFORE assembling, installing or utilizing this product.

DO NOT USE THIS PRODUCT BEFORE FULLY UNDERSTANDING ALL SAFETY WARNINGS AND INSTRUCTIONS. IF YOU HAVE QUESTIONS, ARE UNSURE ABOUT ANY INFORMATION OR NEED ADDITIONAL INFORMATION CONCERNING YOUR PRODUCT, CONTACT OUR CUSTOMER SERVICE DEPARTMENT AT 1-866-972-6168 OR VISIT PRIMALVANTAGE.COM/FIELD-STREAM. KEEP AND MAINTAIN THIS SAFETY AND INSTRUCTION MANUAL IN A SAFE LOCATION FOR FUTURE REFERENCE.
**Treestand Safety Warnings**

Please read the following instruction manual and warnings labels completely before utilizing this product. Failure to understand and execute the instructions and warnings may result in serious injury or death. In the event of an accident, have a plan for rescue, including the use of devices that may be easily reached while suspended. **NEVER** hunt without a rescue plan.

**ALWAYS** read and understand all warnings and instructions. Watch the enclosed DVD in it’s entirety before doing anything with this product including assembly, installation etc. before each use of this product. Failure to read and understand all warnings and instructions and DVD material may result in serious injury or death. Contact a Customer Service Representative with any questions you may have.

**NEVER** exceed weight limit of 300 lbs. **DO NOT** use if your combined weight with all of your hunting gear and any accessories exceeds 300 lbs. Use of tree stand over the weight limit may result in serious injury or death.

**DO NOT** use this tree stand while under the influence of alcohol, medication or any illegal substances. Use of tree stand while under the influence of any of these substances may result in serious injury or death.

**NEVER** use this treestand during inclement weather. **DO NOT** use tree stand during thunderstorms, snowstorms, hurricanes, tornadoes or any other weather conditions that include (but not limited to) lightning, icy conditions, or high winds that could create slippery or dangerous situations.

**NEVER** use treestand If you are feeling ill, nauseous, or dizzy. Physical ailments can reduce your ability to safely install, utilize, and remove your treestand. Please consult a physician prior to use.

**NEVER** use this tree stand if you have a history of health problems such as (but not limited to) heart problems, back problems, high blood pressure, impaired vision, equilibrium impairments, are afraid of heights, have been advised by a doctor or physician not to climb. If you are not physically fit, well rested, and alert, or if you have any other physical or mental condition that would impair your ability to properly use this treestand.

**NEVER** use this tree stand on a tree that is dead, leaning, diseased, loose barked or on a utility pole as the tree may fall, break, or uproot and may result in serious injury or death. **NEVER** rely on a tree branch for support. **NEVER** jump or bounce on a treestand to seat it to the tree.

**NEVER** transport any of your equipment with yourself while ascending or descending the tree. You will need to have two hands free during ascending and descending for safety. Use a haul line to pull up your firearm (unloaded, chamber opened with safety lock engaged, barrel facing towards the ground), bows, arrows, knives or any other equipment to your treestand once you have reached your desired hunting height. **ONLY** pull up hunting equipment after the tree stand has been secured to the tree and after you and your harness have been secured to the tree. Prior to descending, lower your equipment on the opposite side of the tree from which you are climbing. Make sure that the unloaded firearm’s safety lock is engaged and the gun barrel is pointing towards the ground.

**ALWAYS** inform someone of your hunting location, where the treestand will be located and the expected duration of the hunt. **ALWAYS** hunt with a plan and a buddy. Before you leave home, let others know your exact location, when you plan to return and who is with you.

**ALWAYS** carry emergency signal devices such as a cell phone, walkie-talkie, whistle, signal flare, PLD (personal location device) and flashlight with you at all times and within reach even while you are suspended in your harness. Watch for changing weather conditions. In the event of an accident, remain calm and seek help immediately.

**ALWAYS** inspect the tree stand and the Fall Arrest System (Harness) for signs of wear or damage **BEFORE** each use. Also inspect to ensure that nuts and bolts are secure. Pay special attention to the harness and straps, guaranteeing that nothing has been frayed or severed. Destroy all products that cannot be repaired by the manufacturer. Contact a Customer Service Representative for replacement parts. The Fall Arrest System **MUST** be discarded and replaced after a fall has occurred. **DO NOT** store treestand or safety harness outdoors when not in use.

**DO NOT ATTACH YOUR FULL BODY HARNESS TO YOUR TREESTAND.**

**DO NOT** modify or alter your tree stand. Improper installation or adjustment may cause serious injury or death. Remove all contents from box. Inspect for any damaged or missing parts. If any parts are missing or damaged, you must only use certified replacement parts. Using any other replacement parts will void product warranty. **THERE ARE NO EXTRA PARTS.** All parts **MUST** be used to ensure the safety of you and your stand. If you think parts are missing or damaged, **STOP IMMEDIATELY** and contact our Customer Service Department. Using the tree stand with missing or damaged parts may result in serious injury or death. **DO NOT** return this product to the retailer. Contact a Customer Service Representative if you have any missing, damaged or extra parts.

**PRACTICE** installing, adjusting and using your tree stand at ground level prior to using it at an elevated position. Familiarize yourself with the use of climbers by practicing at ground level before using in a hunting environment.

**ALWAYS** keep Instructions (written and video) in a safe place and review before each use. It is the responsibility of the treestand owner to furnish the complete instructions to anyone who borrows or purchases the treestand from you. A safe treestand hunting video has been included. Please view it in its entirety prior to using this product.

**NEVER** use this treestand for any use other than hunting. Our treestands are designed for hunters to wear a Full Body Harness. If you are not completely comfortable and confident with your ability to safely install, ascend, hunt and descend using a Full Body Safety Harness and this treestand, **DO NOT PROCEED.**

**NEVER** use this treestand for trimming trees.

**NEVER** fall asleep in your stand as you may fall out resulting in serious injury or death.

**ALWAYS** be sure to retighten all bolts **BEFORE** each new use of treestand.

**ALWAYS** have a minimum of three people present when installing or removing this treestand.
Treestand Safety Warnings

Correct tightening and adjustments of chains, cables, straps, etc. are critical to stable hang-on installation. All tree stand contact points MUST be in contact with the tree before you step down on your tree stand.

NEVER adjust your stand while in use. Practice the attachment of this treestand at ground level before using in a hunting environment. ALWAYS ensure that you and your treestand are safely secured to a healthy tree. Your tree stand MUST be attached tightly to the tree and secured in place. If the stand is not secure, it may shift while in use, resulting in serious injury or death.

DO NOT leave your treestand outside since weather or animals may cause damage. Tree growth can also cause stress and damage straps and buckles. It must be stored inside when not in use.

Climbing aids such as stick ladders, sectional ladders, steps or such MUST extend above the platform of the hang-on to allow the user to step down on the platform. NEVER step up to the platform. When using a climbing ladder to ascend the tree, the Full Body Harness should be attached to the tree before stepping down into the treestand.

NEVER wear jewelry or loose fitting clothing, which can cause hazardous conditions. Clothing may be caught in your equipment and cause you to fall. You must always wear non-slip or rubber boots. Shoelaces must be tucked into your boots. Rings and necklaces MUST NOT be worn.

NEVER use this treestand with a second person. The treestand is designed for use by ONE person.

NEVER let children use this treestand without adult supervision. This treestand is not a toy. No one under the age of 18 should attempt to use this product without direct adult supervision.

DO NOT use tree stand if any nuts or bolts or parts are loose, bent, or crooked.

ALWAYS know your physical limitations. Don’t take chances. If you start thinking about how high you are, don’t go any higher. Instead, choose a minimum height that will allow for safe, effective and comfortable hunting.

ALWAYS lean forward towards the tree as you climb. NEVER lean out from the treestand for any reason.

NEVER step up from a climbing device to get into your stand. Hang-on climbing aids MUST be placed on the tree at a height above the platform where you can maintain a handhold on the unit and step downwards onto the treestand.

ALWAYS inspect every stick ladder connection every time you use the stick ladder BEFORE you leave the ground. If stick ladder sections are separating, DO NOT use the stick ladder. Sectional ladders and steps should be spaced on the tree to ensure each step is no more than 18 inches apart.

ALWAYS wear a Fall Arrest System (FAS) (Harness) consisting of a full body safety harness with lineman’s belt after leaving the ground. A Full Body Harness with lineman’s belt that meets TMA/ASTM standards MUST always be connected to yourself and the tree during ascending, hunting and descending. The use of a lineman’s belt is REQUIRED AT ALL TIMES during ascending, hunting and descending the tree stand. When using a lineman’s belt to ascend the tree, the full body harness MUST be attached to the tree before stepping onto the tree stand. The length of the harness tether strap must be minimized at all times. It should be adjusted so that it is above the head with no slack in the sitting position and you should have the minimum amount of slack possible when climbing. You MUST stay connected at all times after leaving the ground while using climbing aids, hang-ons and climbing tree stands. Single safety belts and chest harnesses are no longer allowed and should NEVER be used. If you are not wearing a Full Body Harness properly attached to the tree, that is protecting you from a fall, DO NOT leave the ground. Failure to wear your Full Body Harness may result in serious injury or death.

Be aware that falls can occur at anytime after leaving the ground.

ALWAYS read and understand the manufacturer’s Warnings, expiration date (if applicable) and instructions on how to use and how to properly adjust the harness. Practice the use of a full body safety harness at ground level in the presence of a responsible adult to experience the feeling of hanging suspended before using in a hunting environment. Failure to follow harness instructions may result in not being able to return to the stand and being suspended in a harness after a fall, or serious injury or possibly death. If the hunting location is unknown by anyone and communication efforts are unsuccessful, you MUST have a personal plan for rescue/escape because prolonged suspension in a harness may be fatal. It is important to exercise the legs by pushing against the tree or doing other forms of continuous leg exercises to avoid blood pooling while being suspended. Hunters with varying degrees of physical fitness may require different plans to recover/escape the effects of prolonged suspension. Have a personal plan and practice it in the presence of a responsible adult before leaving the ground. No one escape/rescue plan will work for every hunter on every tree in every circumstance. Only you can determine the best recovery/escape plan for your situation before leaving the ground.

ALWAYS have a suspension relief device on your person and readily accessible while using a harness. These devices allow the user to relieve the load on the lower extremities if suspended in a harness and help maintain circulation in the legs, mitigate suspension trauma (blood pooling) or allow descent to the ground. Several optional products/systems are available that offer self-recovery or self-extraction from a fall when suspended in a harness. Some systems automatically descend the user while others allow user control. One of these products/systems can be considered for use as an additional safety precaution against prolonged suspension and suspenion trauma. Be sure to follow the manufacturers’ instructions on the safe use of these products/systems.

Hunt from the ground when self-recovery escape is absent. There is time to make a correct decision on what action to take if a fall occurs while wearing a full body harness. It is important to remember “DO NOT PANIC.” Remain calm and implement your practiced rescue, relief and recovery plan.

NEVER allow the tether strap to get under your chin or around our neck. The length of the harness tether MUST be minimized at all times. It should be adjusted so that it is above the head with no slack (snug) in the sitting position and you should have the minimum amount of slack possible when climbing.

DO NOT extend the tree stand without instructions. The use of the tree stand will void all warranty. Keep the tree stand contact points tight and secure in place. Failure to do so may result in serious injury or death.

ALWAYS inspect your tree stand before each use and during ascending, hunting and descending the tree. The tree stand contact points MUST be secure and in tight contact with the tree at all times.

ALWAYS determine the weight limit of the tree stand and be within the weight limit. Failure to do so may result in serious injury or death.

ALWAYS ensure that the tree stand is in good condition before use. Check for broken, weak or damaged parts. Failure to do so may result in serious injury or death.

ALWAYS secure the tree stand to the tree with proper materials that would allow you to climb up and down the tree in the event of a fall. Failure to do so may result in serious injury or death.

ALWAYS inspect every stick ladder connection every time you use the stick ladder. DO NOT step up to the platform. Sectional ladders and steps should be spaced on the tree to ensure each step is no more than 18 inches apart.

DO NOT use this product if any nuts or bolts or parts are loose, bent or crooked.

ALWAYS lean forward towards the tree as you climb. NEVER lean out from the treestand for any reason.

NEVER step up from a climbing device to get into your stand. Hang-on climbing aids MUST be placed on the tree at a height above the platform where you can maintain a handhold on the unit and step downwards onto the treestand.

ALWAYS inspect every stick ladder connection every time you use the stick ladder BEFORE you leave the ground. If stick ladder sections are separating, DO NOT use the stick ladder. Sectional ladders and steps should be spaced on the tree to ensure each step is no more than 18 inches apart.

ALWAYS wear a Fall Arrest System (FAS) (Harness) consisting of a full body safety harness with lineman’s belt after leaving the ground. A Full Body Harness with lineman’s belt that meets TMA/ASTM standards MUST always be connected to yourself and the tree during ascending, hunting and descending. The use of a lineman’s belt is REQUIRED AT ALL TIMES during ascending, hunting and descending the tree stand. It should be adjusted so that it is above the head with no slack (snug) in the sitting position and you should have the minimum amount of slack possible when climbing.

DO NOT remove any safety warning stickers from this product.

Safety must be your first priority during the use of this product.
Choosing A Safe Tree

• Always thoroughly inspect the tree before installing your product. **Do not** install your TREE/LADDER STAND onto any dead or unsafe tree, telephone or utility pole, structural column, or man-made structure. Doing so may result in serious injury or death.

• Always select the proper tree for use with your TREE/LADDER STAND. Select a live straight tree that fits within size limits recommended (minimum tree diameter must be no less than 9 inches and maximum of 18 inches.). **Do not** rely on a branch for support.

• Do not select a tree in the dark or choose a tree in close proximity to a fence. You must not have any stumps or rocks beneath your tree.

• Never use TREE/LADDER STAND on a tree that is dead, diseased, leaning or on wet and uneven ground as the tree may fall, break or uproot.

• Your tree must not be wet, icy or slippery or on wet, swampy, or loose ground that allows the tree to be unstable. Check the ground under TREE/LADDER STAND to ensure it is firm and level.

• Be sure you have a level stand platform. Your tree must not lean or have any irregular shape.

• Tree must not have any loose or scaly bark or excessive vines, nails, screws, or any other sharp objects protruding that may sever webbing on product. Any surrounding trees must not lean or have dead limbs that may fall onto you or your product.

• **Never hurry!! Hurrying causes accidents!!** While climbing a TREE/LADDER STAND, make slow, even movements no more than ten to twelve inches at a time. Make sure you have proper contact with tree and/or TREE/LADDER STAND every time you move. On ladder tree stand, **Always** maintain three points of contact with each step up the ladder and **Always** lean forward as you climb.

Several treestands are equipped with a footrest, armrests and/or shooting rail. Neither the footrest, armrests nor the shooting rail have been designed to support a user’s weight. Under NO circumstances should you place more than fifteen (15) pounds of weight on these structures. Doing so will put the user in serious risk of injury or death.

Proper Care And Maintenance:

• Inspection for defects (damage, rot, corrosion, cracks, freezing, excessive heat, etc.) before every use is required. Do not use if damage is detected or suspected.

• We recommend replacing all hardware/cables/nuts/bolts/clips on your tree stand every two (2) years or sooner if inspection finds it necessary. Use only Primal Vantage approved replacement straps and parts. Use of any other straps or parts, will be viewed as a modification to the product. Any modification will void the warranties and relieve Primal Vantage from all liabilities. Failure to follow these instructions may result in serious injury or death.

• **Do not** overtighten the hardware. **Do not** use a socket wrench. This can lead to structural damage and may negatively affect the performance of your stand. Failure to follow these instructions may result in serious injury or death.

• All photos are taken from the front view unless otherwise noted.

• In most cases, bolts come with two nylon washers. One washer will be placed against the bolt head the other washer will be placed against the nut.

Assembly Instructions

Remove all contents from packaging and make sure all parts are present before attempting to assemble. Tighten all bolt connections by hand first and then when fully assembled, go back and tighten with a wrench.

1. Lay Bottom Section C on the ground. (See Fig. 1)
2. Insert the male end of Bottom Section C into the female end of Middle Section B. (See Fig. 2)
3. Insert the rest of the sections together by following the above steps. Make sure all connections are tightened securely. Insert 1 - M6 Quickclip G through each section at each insertion point. (See Fig. 3)
4. Attach Bracket F to the front of each stick ladder section and Tree Brace D to the back of each stick ladder section using 1 - M8x65mm Bolt for each section. Wingnut must be installed between the tree brace and the tree. Tighten securely.

Installation Instructions

Model: HEH01314
20' Climbing Stick

1. Thread the buckle strap through one end of the bracket, over the top of the bracket. Then through the other side of the bracket. Pull the strap all the way through so the buckle end is against the bracket. The straps will be attached to the bracket and hang freely until the Stick Ladder is ready to be secured to the tree.

2. Make sure that the steps of the stick ladder all angle upward. With the help of at least two other people, walk the assembled stick ladder up to the desired tree so that all of the tree braces are firmly against the tree (See Fig. 5). The stick ladder MUST be straight and vertical. DO NOT use on a leaning or dead tree. The tree should also have a diameter between 9 and 18 inches.

3. While holding the stick ladder against the tree, press your weight on the first step so that the base of the bottom section settles firmly and completely into the ground.

4. Wrap the Buckle Strap from the bottom section around the back of the tree and insert the strap through the buckle. (See Fig. 6) Make sure that the strap is flat against tree with no slack. Secure section to the tree before climbing.

5. Attach Full Body Safety Harness with Climbing Belt to yourself and the tree according to the manufacturer’s instructions.

6. Climb the bottom section of the stick ladder to reach the Second Section. Stand on the Bottom Section to secure the second strap to the Middle Section. Make sure section is secure before climbing any further.

7. Continue with step 6 for the rest of the sections.

8. When installing and removing stick ladder sections do not undo any strap until you are standing securely on the section below.

DETAILED BUCKLE AND STRAP INSTRUCTIONS

1. Hold buckle as shown.

2. Press down on latch and insert strap underneath teeth as shown.

3. Pull strap to desired length.

4. Pull slack to tighten.
**WARNING**

Failure to follow all warnings listed below could result in serious injury or death.

**ALWAYS** read and understand all warnings and instructions before each use of this product. Failure to read and understand all warnings and instructions may result in serious injury or death.

**ALWAYS** inspect the tree stand for signs of wear or damage BEFORE each use. Also inspect to ensure that nuts and bolts are secure and straps are not frayed, worn, or broken.

**NEVER** exceed weight limit of 300 lbs. **DO NOT** use if your combined weight with all your hunting gear and any accessories exceeds 300 lbs. Use of tree stand over the weight limit may result in serious injury or death.

**ALWAYS** wear a Fall Arrest System (FAS) after leaving the ground. If you are not wearing an FAS that meets ASTM standards, **DO NOT** leave the ground. Failure to wear an FAS may result in serious injury or death.

**DO NOT** use this tree stand while under the influence of alcohol, medication, or illegal substances. Use of tree stand while under the influence of any of these substances may result in serious injury or death.

**NEVER** use this tree stand if you have a history of health problems such as (but not limited to) heart problems, back problems, impaired vision, equilibrium impairments are afraid of heights or have been advised by a doctor not to do any strenuous activity. If you are feeling ill, nauseous, or dizzy **DO NOT** use this tree stand or if you are not physically fit, well rested and alert. Physical ailments can reduce your ability to safely install, utilize and remove your tree stand.

**NEVER** use this tree stand during inclement weather such as (but not limited to) thunderstorms, snowstorms, hurricanes, icy conditions, or high winds that could create slippery or dangerous situations.

**NEVER** use this tree stand on a dead, leaning, loose barked tree or on a utility pole as the tree may fall, break, or uproot and may result in serious injury or death.

**NEVER** remove or deface warning labels.

Manufactured in the year 2019 Primal Vantage Company Inc. 2407 W. Euclid Ave., Littleton, CO 80120 1-866-972-6168
