MODEL: HEH00770
OUTPOST 2X - 18’ TWO PERSON LADDERSTAND

• Always Wear a Safety Harness with this Product
• Practice Using at Ground Level
• Weight Limit: 500 lbs. (300lbs. For An Individual User)
• Tree Size: 9”-18” diameter

Instruction and Safety Manual

SAFETY MUST BE YOUR FIRST PRIORITY WITH THIS PRODUCT

WARNING

Every year serious injury and death can occur from hunting related accidents. To ensure your safety, please COMPLETELY read and follow this safety manual and ALL warning labels BEFORE assembling, installing or utilizing this product.

DO NOT USE THIS PRODUCT BEFORE FULLY UNDERSTANDING ALL SAFETY WARNINGS AND INSTRUCTIONS. IF YOU HAVE QUESTIONS, ARE UNSURE ABOUT ANY INFORMATION OR NEED ADDITIONAL INFORMATION CONCERNING YOUR PRODUCT, CONTACT OUR CUSTOMER SERVICE DEPARTMENT AT 1-866-972-6168 OR VISIT PRIMALVANTAGE.COM/FIELD-STREAM. KEEP AND MAINTAIN THIS SAFETY AND INSTRUCTION MANUAL IN A SAFE LOCATION FOR FUTURE REFERENCE.

The Field & Stream trademark is owned by American Sports Licensing Inc., and is not associated with Field & Stream Licenses Company, LLC or Field & Stream Magazine.

Distributed by Primal Vantage Company Inc., 2407 W. Euclid Ave., Littleton, CO 80120

SAFETY MUST BE YOUR FIRST PRIORITY WITH THIS PRODUCT
TREETREESTAND SAFETY WARNINGS

Please read the following instruction manual and warnings labels completely before utilizing this product. Failure to understand and execute the instructions and warnings may result in serious injury or death. In the event of an accident, have a plan for rescue, including the use of devices that may be easily reached while suspended.

ALWAYS read and understand all warnings and instructions. Watch the enclosed DVD in it’s entirety before doing anything with this product including assembly, installation etc. before each use of this product. Failure to read and understand all warnings and instructions and DVD material may result in serious injury or death. Contact a Customer Service Representative with any questions you may have.

NEVER exceed total weight limit of 500 lbs. DO NOT use if your combined weight with all of your hunting gear and any accessories exceeds 300 lbs. or the combined weight of two people and equipment exceeds 500 lbs. DO NOT exceed the weight limit of the safety harness, refer to harness manufacturer’s warnings for weight limit of safety harness. Use of tree stand over the weight limit may result in serious injury or death.

DO NOT use this tree stand while under the influence of alcohol, medication or any illegal substances. Use of tree stand while under the influence of any of these substances may result in serious injury or death.

NEVER use this treestand during inclement weather. DO NOT use tree stand during thunderstorms, snowstorms, hurricanes, tornadoes or any other weather conditions that include (but not limited to) lightning, icy conditions, or high winds that could create slippery or dangerous situations. End your hunt and return to the ground if inclement weather conditions arise.

NEVER use treestand If you are feeling ill, nauseous, dizzy or if you have a prior condition that could cause a problem. i.e., heart condition, joints that lock-up spinal fusions, etc., or if you are not well rested and alert. Physical ailments can reduce your ability to safely install, utilize, and remove your treestand. Please consult a physician prior to use.

NEVER use this tree stand if you have a history of health problems such as (but not limited to) heart problems, back problems, high blood pressure, impaired vision, equilibrium impairments, are afraid of heights, have been advised by a doctor or physician not to climb. If you are not physically fit, well rested, and alert, or if you have any other physical or mental condition that would impair your ability to properly use this treestand.

NEVER use this tree stand on a tree that is dead, leaning, diseased, loose barked or on a utility pole as the tree may fall, break, or uproot and may result in serious injury or death. NEVER rely on a branch for support.

NEVER jump or bounce on the treestand’s platform or ladder sections to seat it to the tree. Instead, step firmly on the first rung of the bottom ladder section to set the ladder into the ground before proceeding to climb the ladder.

NEVER transport any of your equipment with yourself while ascending or descending the tree. You will need to have two hands free during ascending and descending for safety. Use a haul line to pull up your firearm (unloaded, chamber opened with safety lock engaged, barrel facing towards the ground), bows, arrows, knives or any other equipment to your tree stand once you have reached your desired hunting height. ONLY pull up hunting equipment after the tree stand has been secured to the tree and after you and your harness have been secured to the tree. Prior to descending, lower your equipment on the opposite side of the tree from which you are climbing. Make sure that the unloaded firearm’s safety lock is engaged and the gun barrel is pointing towards the ground.

ALWAYS hunt with a plan and a buddy. Before you leave home, let others know your exact location, when you plan to return and who is with you.

ALWAYS carry emergency signal devices such as a cell phone, walkie-talkie, whistle, signal flare, PLD (personal location device) and flashlight with you at all times and within reach even while you are suspended in your harness. Watch for changing weather conditions. In the event of an accident, remain calm and seek help immediately.

ALWAYS inspect the tree stand and the Fall Arrest System (FAS) (Harness) for signs of wear or damage BEFORE each use. Also inspect to ensure that nuts and bolts are secure. Pay special attention to the harness and straps, guaranteeing that nothing has been frayed or severed. Destroy all products that cannot be repaired by the manufacturer. Contact a Customer Service Representative for replacement parts. The Fall Arrest System MUST be discarded and replaced after a fall has occurred.

DO NOT ATTACH YOUR FULL BODY HARNESS TO YOUR TREESTAND.

NEVER modify your treestand in any way by making repairs, replacing parts, or altering adding or attaching anything to it except if explicitly authorized in writing by the manufacturer. Improper installation or adjustment may cause serious injury or death. Remove all contents from box. Inspect for any damaged or missing parts. If any parts are missing or damaged, you must only use certified replacement parts. Using any other replacement parts will void product warranty. THERE ARE NO EXTRA PARTS. All parts MUST be used to ensure the safety of you and your stand. If you think parts are missing or damaged, STOP IMMEDIATELY and contact our Customer Service Department. Using the tree stand with missing or damaged parts may result in serious injury or death. DO NOT return this product to the retailer. Contact a Customer Service Representative if you have any missing, damaged or extra parts.

ALWAYS keep instructions (written and video) in a safe place and review before each use. It is the responsibility of the treestand owner to furnish the complete instructions to anyone who borrows or purchases the treestand from you. A safe treestand hunting video has been included. Please view it in it’s entirety prior to using this product.

NEVER use this treestand for any use other than hunting. Our treestands are designed for hunter’s to wear a Full Body Harness. If you are not completely comfortable and confident with your ability to safely install, ascend, hunt and descend using a Full Body Safety Harness with this treestand, DO NOT PROCEED.

NEVER use this treestand for trimming trees.

NEVER fall asleep in your stand as you may fall out resulting in serious injury or death.

ALWAYS be sure to check and retighten any bolts BEFORE each new use of treestand.

ALWAYS have a minimum of three people present when installing or removing this treestand.
TREESTAND SAFETY WARNINGS

NEVER adjust your stand while in use. Practice the attachment of this treestand at ground level before using in a hunting environment. ALWAYS ensure that you and your treestand are safely secured to a healthy tree. Your treestand MUST be attached tightly to the tree and secured in place. If the stand is not secure, it may shift while in use, resulting in serious injury or death.

The Installation Cross Straps and Stabilizer Bar(s) MUST be properly installed before each use of the treestand.

ALWAYS inspect every ladder section connection every time you use the stand before you leave the ground. If ladder sections are separating, with the help of at least two other people, lower the stand to the ground, make adjustments, and reinstall.

ALWAYS check the ground below the tree stand to make sure it is firm and level. Sloping ground or uneven terrain (one side of a rock or root) can cause your tree stand to tilt or shift.

ALWAYS maintain three points of contact when climbing the tree stand. (Two feet and one hand or one foot and two hands.)

DO NOT leave your treestand outside since weather or animals may cause damage. Tree growth can also cause stress and damage straps and buckles. It must be stored inside when not in use.

NEVER wear jewelry or loose fitting clothing, which can cause hazardous conditions. Clothing may be caught in your equipment and cause you to fall. You must always wear non-slip or rubber boots. Shoelaces must be tucked into your boots. Rings and necklaces MUST NOT be worn.

NEVER use this treestand with a third person. The treestand is designed for use by ONE person or TWO people.

NEVER let children use this treestand without adult supervision. This treestand is not a toy. No one under the age of 18 should attempt to use this product without direct adult supervision.

DO NOT use tree stand if any nuts or bolts or parts are loose, bent, or crooked.

ALWAYS lean forward towards the tree as you climb and attach your harness to the tree BEFORE securing the platform to the tree and stepping onto the platform. NEVER lean out from the treestand for any reason.

ALWAYS wear a Fall Arrest System (FAS) (Harness) consisting of a full body safety harness after leaving the ground. A Full Body Harness that meets TMA/ASTM standards MUST always be connected to yourself and the tree during ascending, hunting and descending. Single safety belts and chest harnesses are no longer allowed and should NEVER be used. If you are not wearing a Full Body Harness properly attached to the tree, that is protecting you from a fall, DO NOT leave the ground. Failure to wear your Full Body Harness may result in serious injury or death. Be aware that falls can occur at anytime after leaving the ground.

ALWAYS read and understand the manufacturer’s Warnings, expiration date (if applicable) and instructions on how to use and how to properly adjust the harness. Practice the use of a full body safety harness at ground level in the presence of a responsible adult to experience the feeling of hanging suspended before using in a hunting environment. Failure to follow harness instructions may result in not being able to return to the stand and being suspended in a harness after a fall, or serious injury or possibly death. If the hunting location is unknown by anyone and communication efforts are unsuccessful, you MUST have a personal plan for rescue/escape because prolonged suspension in a harness may be fatal. It is important to exercise the legs by pushing against the tree or doing other forms of continuous leg exercises to avoid blood pooling while being suspended. Hunters with varying degrees of physical fitness may require different plans to recover/escape the effects of prolonged suspension. Have a personal plan and practice it in the presence of a responsible adult before leaving the ground. No one escape/rescue plan will work for every hunter on every tree in every circumstance. Only you can determine the best recovery/escape plan for your situation before leaving the ground.

ALWAYS have a suspension relief device on your person and readily accessible while using a harness. These devices allow the user to relieve the load on the lower extremities if suspended in a harness and help maintain circulation in the legs, mitigate suspension trauma (blood pooling) or allow descent to the ground. Hunters with varying degrees of physical fitness may require a personal plan for rescue/escape because prolonged suspension in a harness may be fatal. It is important to exercise the legs by pushing against the tree or doing other forms of continuous leg exercises to avoid blood pooling while being suspended. Hunters with varying degrees of physical fitness may require different plans to recover/escape the effects of prolonged suspension. Have a personal plan and practice it in the presence of a responsible adult before leaving the ground. No one escape/rescue plan will work for every hunter on every tree in every circumstance. Only you can determine the best recovery/escape plan for your situation before leaving the ground.

ALWAYS have a suspension relief device on your person and readily accessible while using a harness. These devices allow the user to relieve the load on the lower extremities if suspended in a harness and help maintain circulation in the legs, mitigate suspension trauma (blood pooling) or allow descent to the ground. Several optional products/systems are available that offer self-recovery or self-extraction from a fall when suspended in a harness. Some systems automatically descend the user while others allow user control. One of these products/systems can be considered for use as an additional safety precaution against prolonged suspension and suspension trauma, Be sure to follow the manufacturers’ instructions on the safe use of these products/systems.

Hunt from the ground when self-recovery escape is absent. There is time to make a correct decision on what action to take if a fall occurs while wearing a full body harness. It is important to remember “DO NOT PANIC.” Remain calm and implement your practiced rescue, relief and recovery plan.

NEVER allow the tether strap to get under your chin or around our neck. The length of the harness tether MUST be minimized at all times. It should be adjusted so that it is above the head with no slack (snug) in the sitting position and you should have the minimum amount of slack possible when climbing.

ALWAYS be physically fit, well rested and alert. Physical ailments can affect your ability to use this tree stand or If you are not physically fit, feel afraid of heights or have been advised by a doctor not to use this tree stand on a dead, leaning, or crooked tree stand from the tree, tighten all connections. If ladder sections are separating, with the help of at least two other people, lower the stand to the ground, make adjustments, and reinstall.

NEVER inspect the treestand before use if the ladder sections are separated or do not contact the tree stand. Securely attach the platform to the tree and tighten the cross straps to ensure that the treestand is not tilted or shifted. MUST always have a suspension relief device on your person and readily accessible while using a harness. These devices allow the user to relieve the load on the lower extremities if suspended in a harness and help maintain circulation in the legs, mitigate suspension trauma (blood pooling) or allow descent to the ground.

It should be adjusted so that it is above the head with no slack (snug) in the sitting position and you should have the minimum amount of slack possible when climbing.
CHOOSING A SAFE TREE

- **ALWAYS** thoroughly inspect the tree before installing your product. **DO NOT** install your TREE/LADDER STAND onto any dead or unsafe tree, telephone or utility pole, structural column, or man-made structure. Doing so may result in serious injury or death.

- **ALWAYS** select the proper tree for use with your TREE/LADDER STAND. Select a live straight tree that fits within size limits recommended (minimum tree diameter must be no less than 9 inches and maximum of 18 inches.). **DO NOT** rely on a branch for support.

- **DO NOT** select a tree in the dark or choose a tree in close proximity to a fence. You must not have any stumps or rocks beneath your tree.

- **NEVER** use TREE/LADDER STAND on a tree that is dead, diseased, leaning or on wet and uneven ground as the tree may fall, break or uproot.

- Your tree must not be wet, icy or slippery or on wet, swampy, or loose ground that allows the tree to be unstable. Check the ground under TREE/LADDER STAND to ensure it is firm and level.

- Be sure you have a level stand platform. Your tree must not lean or have any irregular shape.

- Tree must not have any loose or scaly bark, excessive vines, nails, screws, or any other sharp objects protruding that may sever webbing on product. Any surrounding trees must not lean or have dead limbs that may fall onto you or your product.

- **NEVER HURRY!! HURRYING CAUSES ACCIDENTS!!** While climbing a TREE/LADDER STAND, make slow, even movements no more that ten to twelve inches at a time. Make sure you have proper contact with tree and/or TREE/LADDER STAND every time you move. On ladder tree stand, **ALWAYS** maintain three points of contact with each step and **ALWAYS** lean forward as you climb.

- Several treestands are equipped with a footrest, armrests and/or shooting rail. Neither the footrest, armrests nor the shooting rail have been designed to support a user’s weight. Under NO circumstances should you place more than fifteen (15) pounds of weight on these structures. Doing so will put the user in serious risk of injury or death.

PROPER CARE AND MAINTENANCE:

- Inspection for defects (damage, rot, corrosion, cracks, freezing, excessive heat, etc.) before every use is required. Do not use if damage is detected or suspected.

- We recommend replacing all hardware/cables/nuts/bolts/clips on your tree stand every two (2) years or sooner if inspection finds it necessary. Use only Primal Vantage approved replacement straps and parts. Use of any other straps or parts, will be viewed as a modification to the product. Any modification will void the warranties and relieve Primal Vantage from all liabilities. Failure to follow these instructions may result in serious injury or death.

- **DO NOT** overtighten the hardware. **DO NOT** use a socket wrench. This can lead to structural damage and may negatively affect the performance of your stand. Failure to follow these instructions may result in serious injury or death.

- All photos are taken from the front view unless otherwise noted.

- In most cases, bolts come with two nylon washers. One washer will be placed against the bolt head and the other washer will be placed against the nut.

CUSTOMER SERVICE DEPARTMENT 1-866-972-6168
PRIMALVANTAGE.COM/FIELD-STREAM
Attach each Foot Platform D to Platform Support F and G using 4-M12x70mm Bolts. Make sure that the rounded edges of each platform are touching.

NOTE: The INSIDE of the Platform Supports are flat. Make sure that the rounded edge of the Platform is on the outside.

Attach each Rear Brace K to the outside of rear Foot Platform D using 1-M12x60mm Bolt on each side.

Attach Lower Tree Brace E to the rear of each Platform Support using 2-M12x70mm Bolts.

Attach Left and Right Handle Rail H and J to the outside of FRONT Foot Platform D using 1-M12x70mm Bolt.

NOTE: The flat side of each Handle Rail will be on the INSIDE of the stand.

The bracketed end of Handle Rails H and J will attach to the lowest hole on Rear Brace K using 1-M12x45mm Bolt on each side.
5. Attach Seat Platform C to the brackets on Handle Rails H and J using 1-M12x40mm Bolt w/spacers. (See Right Side Closeup)

6. Attach Backrest L to the front holes of Rear Brace K using 1-M12x60mm Bolts on each side.

7. Attach Upper Tree Brace M to the rear holes on Rear Brace K using 1-M12x70mm Bolts on each side.
Slide Shooting Rail Bracket \( Q \) onto Armrest \( N \) and screw in Shooting Rail Knob \( P \). Repeat for other armrest but slide Shooting Rail Bracket and Shooting Rail Knob on opposite side.

**NOTE:** The Shooting Rail Knobs will be on the OUTSIDE of the stand so that the assembled Shooting Rail will rest on top of the knobs.

Slide each Shooting Rail Extender \( Q \) into Shooting Rail \( R \) and attach with 1-M10x25mm Bolt on each side.

**NOTE:** The welded sleeve on each Shooting Rail Extender needs to be on the INSIDE of the Shooting Rail.

Also, make sure that the angle of the shooting rail is towards the sky.

Attach the top of each Armrest \( N \) to the top holes of Rear Brace \( K \) using 1-M10x55mm Bolts on each side. Attach the bottom of each Armrest \( N \) to each Handle Rail \( H \) and \( J \) using 1-M10x65mm Bolt on each side.

Attach Assembled Shooting Rail to remaining hole on Rear Brace \( K \) using 1-M10x80mm Bolt w/spacer on each side. (See Left Shooting Rail Closeup)

**NOTE:** Make sure that the bracket on the shooting rail extenders are on the inside.

13. Slide Top Ladder Section A into Platform Supports F and G. Attach with 1-M12x45mm Bolt on each side.

14. Attach one end of Platform Brace S to the OUTSIDE of Platform Supports F and G underneath the assembled foot platform using 1-M12x70mm Bolt on each side.

Attach the other end of Platform Brace S to the OUTSIDE of Top Ladder Section A using 1-M12x70mm Bolt on each side.

ALL PHOTOS TAKEN FROM FRONT VIEW UNLESS OTHERWISE NOTED
LADDER ASSEMBLY

1. Insert Ladder Section B into the sleeved end of Top Ladder Section A.

2. Insert 1 - Quickclip through the hole on the sleeve and through the ladder sections on each side of the ladder.

3. Close the quickclip to secure the ladder sections together.

4. Follow Steps 1-3 above to attach the bottom section to the middle section.
1. Place looped end of strap under platform.

2. Insert end of strap through the loop.

3. Pull to tighten. Repeat steps 1-8 to install the other strap on the other side of the platform.

4. Place loose end of strap with clip, under the top rung of the bottom ladder section.

5. Insert the strap through Slot 1 on the clip.

6. Insert the strap through the Slot 2 with the teeth.

7. Pull strap to tighten.

8. Slide the buckles out to the sides to create tension on the straps.

**WARNING** DO NOT sit on the seat platform until the Ratchet Strap and Installation Straps have been secured.
Ratchet Strap Instructions

1. Place looped end of Ratchet under platform.
2. Insert Ratchet through loop.
3. Pull to tighten.
4. Place looped end of strap under platform.
5. Insert strap through loop.
6. Pull to tighten.

Detailed Ratchet Strap Instructions

1. Open ratchet handle flat and insert end of strap through opening.
2. Pull Strap through opening.
3. Insert end of strap through slot in ratchet wheel.
4. Ratchet handle back and forth to tighten strap. Ensure that the ratchet wheel makes at least one and a half revolutions once installed. **DO NOT** allow the ratchet wheel to over-fill and contact the ratchet mechanism of the ratchet strap.
5. After strap is tight, close handle to the locked position.
6. To release tension, push spring loaded retaining lock and simultaneously pull on strap.

**YOU MUST READ AND FOLLOW ALL INSTRUCTIONS PRIOR TO INSTALLATION**
1. Position bottom of stand 4-5 feet from base of tree.

2. One person will stand at the base of ladder with his/her foot on the bottom rung while holding installation straps. This will prevent tree stand from sliding. Two people will stand at opposite ends of tree stand, facing platform and slowly walk tree stand upward using rungs of ladder.

3. As tree stand is being raised, the person holding installation straps will pull toward themselves to take up slack. It will steady and ease the weight of stand on the other two people. Continue walking stand upward, until Tree Connection Brace is resting against the tree.

4. Slide the inner part of the Stabilizer Bar into the outer part. Attach Stabilizer Bar to the second rung of the Middle Ladder Section with 1 - M12x45mm bolt and 1 wingnut. Insert the Adjustment Knob in the Stabilizer bar at the proper adjustment point to the tree.

**NOTE:** Drawings are for illustration purposes only and may not depict actual product.
INSTALLATION INSTRUCTIONS PAGE 2

MODEL: HEH00770
OUTPOST 2X 18’ LADDER TREESTAND

5. Move base of ladder toward or away from tree slightly in order to make Platform as parallel to the ground as possible.

Apply your full weight to the first step so it settles into the ground.

6. Cross Installation Straps behind tree. Attach to the top rung of the bottom ladder section. (See Installation Strap Instructions)

7. Attach Buckle Strap W just behind the brace of the inner part of Stabilizer Bar T by following the Strap Installation below. (See Strap Installation Below)

Position the Stabilizer Bar against the tree and secure it by wrapping the strap around the back of the tree once and insert the strap into the buckle. (See Buckle Instructions Below)

---

STRAP INSTALLATION

1. Hold Strap as shown.

2. Insert Strap through looped end.

3. Pull Strap to tighten.

4. Use these same instructions to attach the buckle.

BUCKLE INSTRUCTIONS

1. Hold buckle as shown.

2. Press down on latch and insert strap underneath teeth as shown.

3. Pull strap to desired length.

4. Pull slack to tighten.

**Stabilizer Bar and Installation Straps**

**MUST** be secured prior to climbing the Ladderstand. Failure to comply may result in serious injury or death.

**WARNING**

DO NOT climb ladder without Stabilizer Bar or Installation Straps installed. Serious injury or death may occur if Stabilizer Bar and Installation Straps are not installed.

---

**Cautiously climb to the top of the treestand. Wrap the strap of the ratchet around the back of the tree once and thread through the ratchet.**

(See Detailed Ratchet Instructions Below)

---

**Detailed Ratchet Strap Instructions**

1. Open ratchet handle flat and insert end of strap through opening.
2. Pull Strap through opening.
3. Insert end of strap through slot in ratchet wheel.
4. Ratchet handle back and forth to tighten strap. Ensure that the ratchet wheel makes at least one and a half revolutions once installed. **DO NOT** allow the ratchet wheel to over-fill and contact the ratchet mechanism of the ratchet strap.
5. After strap is tight, close handle to the locked position.
6. To release tension, push spring loaded retaining lock and simultaneously pull on strap.

---

**WARNING**

DO **NOT** sit on seat platform until the Ratchet and Installation Straps have been secured.

---

**WARNING**

**DO NOT** climb the tree with the installation straps, and the stabilizer bar has been securely attached to the tree, continue to have two people hold the ladder and climb cautiously up to the platform. Once you reach the top, IMMEDIATELY ATTACH YOUR SAFETY HARNESS TO THE TREE. Keep the tether strap above your head.

Distributed by Primal Vantage Company Inc., 2407 W. Euclid Ave., Littleton, CO 80120
CUSTOMER SERVICE DEPARTMENT 1-866-972-6168
1. Slide Front Brace I onto Front Frame Corner A. There are three holes on each side brace that MUST be facing the inside of the frame. SEE CLOSEUP

2. Slide each Side Brace F onto the other end of Front Frame Corner A. There are three holes on each side brace that MUST be facing the inside of the frame. SEE CLOSEUP
3. Slide each Rear Frame Corner **B** into Top Tree Brace **E**. The “U” part of the brace **MUST** be on top of the frame. **SEE CLOSEUP**

4. Slide each Rear Frame Corner **B** into Side Braces **F**.
NOTE: ALL WASHERS ARE AGAINST THE BOLT HEAD AND THE NUT UNLESS STATED OTHERWISE

5. Attach Left Frame Support C to the left Side Brace F using 1-M10x40mm bolt.

6. Attach Right Frame Support D (the one with the nut on it) on the Right Side Brace F using 1-M10x40mm bolt.
7. Attach Vertical Support J to Top Tree Brace E with 1-M12x55mm bolt.

8. Attach both Brackets G to the center hole of Vertical Support J using 1-M12x45mm Bolt.

Attach Bottom Tree Brace H to Vertical Support J using 1-M12x55mm Bolt.

NOTE: ALL WASHERS ARE AGAINST THE BOLT HEAD AND THE NUT UNLESS STATED OTHERWISE
Attach Left and Right Frame Supports to Vertical Support J using M10 Knob O. The Knob will go through Left Frame Support C then through Vertical Post J then tightened through Right Frame Support D. **SEE CLOSEUP**

**NOTE:** ALL WASHERS ARE AGAINST THE BOLT HEAD AND THE NUT UNLESS STATED OTHERWISE.
10. Insert top Pole M into Front Frame Support A.
   Insert middle Pole M into Side Brace F.
   Insert bottom Pole M into Rear Frame Support B.

11. Attach Roof/Blind Cover K to the assembled roof frame by using the self sticking fabric strips on the front, rear and sides of the frame.

12. Turn the assembled Roof over so the frame is underneath. Pull the Blind Sides out so the camo is on the outside.
   Roll up the Blind Sides and tie them to the attached ties on the Roof.
Raise the Roof Assembly to the tree using a safe hoist/lift system to 3 feet above the shooting rail of your treestand.

Attach the Vertical Support to the tree by using Buckle Strap N. Hook Buckle Strap N to Bracket G. Wrap the strap around the tree once and attach the other end to the bracket. (See Buckle Strap Instructions). Pull strap until it is tight against the tree.

**WARNING**
You MUST use a Hoist system to lift the Roof to the Stand for installation. DO NOT climb the Ladder with the Roof and Blind in Hand.

**WARNING**
NEVER stand on seat platform to attach roof. Raise flip-up seat platform to move closer to tree.

**BUCKLE STRAP INSTRUCTIONS**

1. Hold buckle as shown.
2. Press down on latch and insert strap underneath teeth as shown.
3. Pull strap to desired length.
4. Pull slack to tighten.
ALWAYS read and understand all warnings and instructions before each use of this product. Failure to read and understand all warnings and instructions may result in serious injury or death.

ALWAYS inspect the tree stand for signs of wear or damage BEFORE each use. Also inspect to ensure that nuts and bolts are secure and straps are not frayed, worn, or broken.

NEVER exceed weight limit of 300 lbs. DO NOT use if your combined weight with all your hunting gear and any accessories exceeds 300 lbs. Use of tree stand over the weight limit may result in serious injury or death.

ALWAYS wear a Fall Arrest System (FAS) after leaving the ground. If you are not wearing an FAS that meets ASTM standards, DO NOT leave the ground. Failure to wear an FAS may result in serious injury or death.

DO NOT use this tree stand while under the influence of alcohol, medication, or illegal substances. Use of tree stand while under the influence of any of these substances may result in serious injury or death.

NEVER use this tree stand if you have a history of health problems such as (but not limited to) heart problems, back problems, impaired vision, equilibrium impairments are afraid of heights or have been advised by a doctor not to do any strenuous activity. If you are feeling ill, nauseous, or dizzy DO NOT use this tree stand or if you are not physically fit, well rested and alert. Physical ailments can reduce your ability to safely install, utilize and remove your tree stand.

NEVER use this tree stand during indelment weather such as (but not limited to) thunderstorms, snowstorms, hurricanes, icy conditions, or high winds that could create slippery or dangerous situations.

NEVER use this tree stand on a dead, leaning, loose barked tree or on a utility pole as the tree may fall, break, or uproot and may result in serious injury or death.

DO NOT modify or alter your tree stand.

NEVER remove or deface warning labels.

Installation Straps, Ratchet Straps, Quickclips, Tiedown Ropes and Stabilizer Bars MUST be installed and secured prior to climbing tree stand. Failure to comply may result in serious injury or death.

DO NOT climb ladder without Stabilizer Bar and Installation Straps installed. These MUST be correctly installed prior to use. Serious injury or death may occur if Stabilizer Bar and Installation Straps are not installed.
