OUTPOST 16’ LADDER TREESTAND

Instruction and Safety Manual

FIELD & STREAM™
1871

WARNING
Every year serious injury and death can occur from hunting related accidents. To ensure your safety, please COMPLETELY read and follow this safety manual and ALL warning labels BEFORE assembling, installing or utilizing this product.

DO NOT USE THIS PRODUCT BEFORE FULLY UNDERSTANDING ALL SAFETY WARNINGS AND INSTRUCTIONS. IF YOU HAVE QUESTIONS, ARE UNSURE ABOUT ANY INFORMATION OR NEED ADDITIONAL INFORMATION CONCERNING YOUR PRODUCT, CONTACT OUR CUSTOMER SERVICE DEPARTMENT AT 1-866-972-6168 OR VISIT PRIMALVANTAGE.COM/FIELD-STREAM. KEEP AND MAINTAIN THIS SAFETY AND INSTRUCTION MANUAL IN A SAFE LOCATION FOR FUTURE REFERENCE.

The Field & Stream trademark is owned by American Sports Licensing Inc., and is not associated with Field & Stream Licenses Company, LLC or Field & Stream Magazine.

SAFETY MUST BE YOUR FIRST PRIORITY WITH THIS PRODUCT
TREESTAND SAFETY WARNINGS

Please read the following instruction manual and warnings labels completely before utilizing this product. Failure to understand and execute the instructions and warnings may result in serious injury or death. In the event of an accident, have a plan for rescue, including the use of devices that may be easily reached while suspended. NEVER hunt without a rescue plan.

ALWAYS read and understand all warnings and instructions. Watch the enclosed DVD in its entirety before doing anything with this product including assembly, installation etc. before each use of this product. Failure to read and understand all warnings and instructions and DVD material may result in serious injury or death. Contact a Customer Service Representative with any questions you may have.

NEVER exceed weight limit of 300 lbs. DO NOT use if your combined weight with all of your hunting gear and any accessories exceeds 300 lbs. Use of tree stand over the weight limit may result in serious injury or death.

DO NOT use this tree stand while under the influence of alcohol, medication or any illegal substances. Use of tree stand while under the influence of any of these substances may result in serious injury or death.

NEVER use this treestand during inclement weather. DO NOT use tree stand during thunderstorms, snowstorms, hurricanes, tornadoes or any other weather conditions that include (but not limited to) lightning, icy conditions, or high winds that could create slippery or dangerous situations.

NEVER use treestand if you are feeling ill, nauseous, or dizzy. Physical ailments can reduce your ability to safely install, utilize, and remove your treestand. Please consult a physician prior to use.

NEVER use this tree stand if you have a history of health problems such as (but not limited to) heart problems, back problems, high blood pressure, impaired vision, equilibrium impairments, are afraid of heights, have been advised by a doctor or physician not to climb. If you are not physically fit, well rested, and alert, or if you have any other physical or mental condition that would impair your ability to properly use this treestand.

NEVER use this tree stand on a tree that is dead, leaning, diseased, loose barked or on a utility pole as the tree may fall, break, or uproot and may result in serious injury or death. NEVER rely on a tree branch for support. NEVER jump or bounce on a treestand to seat it to the tree.

NEVER transport any of your equipment with yourself while ascending or descending the tree. You will need to have two hands free during ascending and descending for safety. Use a haul line to pull up your firearm (unloaded, chamber opened with safety lock engaged, barrel facing towards the ground), bows, arrows, knives or any other equipment to your tree stand once you have reached your desired hunting height. ONLY pull up hunting equipment after the tree stand has been secured to the tree and after you and your harness have been secured to the tree. Prior to descending, lower your equipment on the opposite side of the tree from which you are climbing. Make sure that the unloaded firearm’s safety lock is engaged and the gun barrel is pointing towards the ground.

ALWAYS inform someone of your hunting location, where the treestand will be located and the expected duration of the hunt. ALWAYS hunt with a plan and a buddy. Before you leave home, let others know your exact location, when you plan to return and who is with you.

ALWAYS carry emergency signal devices such as a cell phone, walkie-talkie, whistle, signal flare, PLD (personal location device) and flashlight with you at all times and within reach even while you are suspended in your harness. Watch for changing weather conditions. In the event of an accident, remain calm and seek help immediately.

ALWAYS inspect the tree stand and the Fall Arrest System (Harness) for signs of wear or damage BEFORE each use. Also inspect to ensure that nuts and bolts are secure. Pay special attention to the harness and straps, guaranteeing that nothing has been frayed or severed. Destroy all products that cannot be repaired by the manufacturer. Contact a Customer Service Representative for replacement parts. The Fall Arrest System MUST be discarded and replaced after a fall has occurred. DO NOT store treestand or safety harness outdoors when not in use.

DO NOT ATTACH YOUR FULL BODY HARNESS TO YOUR TREESTAND.

DO NOT modify or alter your tree stand. Improper installation or adjustment may cause serious injury or death. Remove all contents from box. Inspect for any damaged or missing parts. If any parts are missing or damaged, you must only use certified replacement parts. Using any other replacement parts will void product warranty. THERE ARE NO EXTRA PARTS. All parts MUST be used to ensure the safety of you and your stand. If you think parts are missing or damaged, STOP IMMEDIATELY and contact our Customer Service Department. Using the tree stand with missing or damaged parts may result in serious injury or death. DO NOT return this product to the retailer. Contact a Customer Service Representative if you have any missing, damaged or extra parts.

PRACTICE installing, adjusting and using your tree stand at ground level prior to using it at an elevated position. Familiarize yourself with the use of climbers by practicing at ground level before using in a hunting environment.

ALWAYS keep Instructions (written and video) in a safe place and review before each use. It is the responsibility of the treestand owner to furnish the complete instructions to anyone who borrows or purchases the treestand from you. A safe treestand hunting video has been included. Please view it in its entirety prior to using this product.

NEVER use this treestand for any use other than hunting. Our treestands are designed for hunter’s to wear a Full Body Harness. If you are not completely comfortable and confident with your ability to safely install, ascend, hunt and descend using a Full Body Safety Harness and this treestand, DO NOT PROCEED.

NEVER use this treestand for trimming trees.

NEVER fall asleep in your stand as you may fall out resulting in serious injury or death.

ALWAYS be sure to retighten all bolts BEFORE each new use of treestand.

ALWAYS have a minimum of three people present when installing or removing this treestand.
TREESTAND SAFETY WARNINGS

NEVER adjust your stand while in use. Practice the attachment of this treestand at ground level before using in a hunting environment. ALWAYS ensure that you and your treestand are safely secured to a healthy tree. Your treestand MUST be attached tightly to the tree and secured in place. If the stand is not secure, it may shift while in use, resulting in serious injury or death.

The Installation Cross Straps and Stabilizer Bar(s) MUST be properly installed before each use of the treestand.

ALWAYS inspect every ladder section connection every time you use the stand before you leave the ground. If ladder sections are separating, with the help of at least two other people, lower the stand to the ground, make adjustments, and reinstall. 

ALWAYS check the ground below the tree stand to make sure it is firm and level. Sloping ground or uneven terrain (one side of a rock or root) can cause your tree stand to tilt or shift.

ALWAYS maintain three points of contact when climbing the tree stand. (Two feet and one hand or one foot and two hands.)

ALWAYS lean forward as you climb and attach your harness to the tree before securing the platform to the tree and stepping onto the platform.

DO NOT leave your treestand outside since weather or animals may cause damage. Tree growth can also cause stress and damage straps and buckles. It must be stored inside, free of moisture, when not in use.

NEVER let children use this treestand without adult supervision. This treestand is not a toy. No one under the age of 18 should attempt to use this product without direct adult supervision.

NEVER use tree stand if any nuts or bolts or parts are loose, bent, or crooked. 

ALWAYS know your physical limitations. Don’t take chances. If you start thinking about how high you are, don’t go any higher. Instead, choose a minimum height that will allow for safe, effective and comfortable hunting.

ALWAYS lean forward towards the tree as you climb and attach your harness to the tree BEFORE securing the platform to the tree and stepping onto the platform. NEVER lean out from the treestand for any reason.

ALWAYS wear a Fall Arrest System (FAS) (Harness) consisting of a full body safety harness after leaving the ground. A Full Body Harness that meets TMA/ASTM standards MUST always be connected to yourself and the tree during ascending, hunting and descending. Single safety belts and chest harnesses are no longer allowed and should NEVER be used. If you are not wearing a Full Body Harness properly attached to the tree, that is protecting you from a fall, DO NOT leave the ground. Failure to wear your Full Body Harness may result in serious injury or death. Be aware that falls can occur at anytime after leaving the ground.

ALWAYS read and understand the manufacturer’s Warnings, expiration date (if applicable) and instructions on how to use and how to properly adjust the harness. Practice the use of a full body safety harness at ground level in the presence of a responsible adult to experience the feeling of hanging suspended before using in a hunting environment. Failure to follow harness instructions may result in not being able to return to the stand and being suspended in a harness after a fall, or serious injury or possibly death. If the hunting location is unknown by anyone and communication efforts are unsuccessful, you MUST have a personal plan for rescue/escape because prolonged suspension in a harness may be fatal. It is important to exercise the legs by pushing against the tree or doing other forms of continuous leg exercises to avoid blood pooling while being suspended. Hunters with varying degrees of physical fitness may require different plans to recover/escape the effects of prolonged suspension. Have a personal plan and practice it in the presence of a responsible adult before leaving the ground. No one escape/rescue plan will work for every hunter on every tree in every circumstance. Only you can determine the best recovery/escape plan for your situation before leaving the ground.

ALWAYS have a suspension relief device on your person and readily accessible while using a harness. These devices allow the user to relieve the load on the lower extremities if suspended in a harness and help maintain circulation in the legs, mitigate suspension trauma (blood pooling) or allow descent to the ground. Several optional products/systems are available that offer self-recovery or self-extraction from a fall when suspended in a harness. Some systems automatically descend the user while others allow user control. One of these products/systems can be considered for use as an additional safety precaution against prolonged suspension and suspension trauma. Be sure to follow the manufacturers’ instructions on the safe use of these products/systems.

Hunt from the ground when self-recovery escape is absent. There is time to make a correct decision on what action to take if a fall occurs while wearing a full body harness. It is important to remember “DO NOT PANIC.” Remain calm and implement your practiced rescue, relief and recovery plan.

NEVER allow the tether strap to get under your chin or around our neck. The length of the harness tether MUST be minimized at all times. It should be adjusted so that it is above the head with no slack (snug) in the sitting position and you should have the minimum amount of slack possible when climbing.

NEVER remove any safety warning stickers from this product. Safety must be your first priority during the use of this product.

CUSTOMER SERVICE DEPARTMENT 1-866-972-6168

PRIMALVANTAGE.COM/FIELD-STREAM
CHOOSING A SAFE TREE

• **ALWAYS** thoroughly inspect the tree before installing your product. **DO NOT** install your TREE/LADDER STAND onto any dead or unsafe tree, telephone or utility pole, structural column, or man-made structure. Doing so may result in serious injury or death.

• **ALWAYS** select the proper tree for use with your TREE/LADDER STAND. Select a live straight tree that fits within size limits recommended (minimum tree diameter must be no less than 9 inches and maximum of 18 inches.). **DO NOT** rely on a branch for support.

• **DO NOT** select a tree in the dark or choose a tree in close proximity to a fence. You must not have any stumps or rocks beneath your tree.

• **NEVER** use TREE/LADDER STAND on a tree that is dead, diseased, leaning or on wet and uneven ground as the tree may fall, break or uproot.

• Your tree must not be wet, icy or slippery or on wet, swampy, or loose ground that allows the tree to be unstable. Check the ground under TREE/LADDER STAND to ensure it is firm and level.

• Be sure you have a level stand platform. Your tree must not lean or have any irregular shape.

• Tree must not have any loose or scaly bark or excessive vines, nails, screws, or any other sharp objects protruding that may sever webbing on product. Any surrounding trees must not lean or have dead limbs that may fall onto you or your product.

• **NEVER HURRY!!** **HURRYING CAUSES ACCIDENTS!!** While climbing a TREE/LADDER STAND, make slow, even movements no more than ten to twelve inches at a time. Make sure you have proper contact with tree and/or TREE/LADDER STAND every time you move. On ladder tree stand, **ALWAYS** maintain three points of contact with each step and **ALWAYS** lean forward as you climb.

Several treestands are equipped with a footrest, armrests and/or shooting rail. Neither the footrest, armrests nor the shooting rail have been designed to support a user's weight. Under **NO** circumstances should you place more than fifteen (15) pounds of weight on these structures. Doing so will put the user in serious risk of injury or death.

PROPER CARE AND MAINTENANCE:

• Inspect for defects (damage, rot, corrosion, cracks, freezing, excessive heat, etc.) before every use is required. Do not use if damage is detected or suspected.

• We recommend replacing all hardware/cables/nuts/bolts/clips on your tree stand every two (2) years or sooner if inspection finds it necessary. Use only Primal Vantage approved replacement straps and parts. Use of any other straps or parts, will be viewed as a modification to the product. Any modification will void the warranties and relieve Primal Vantage from all liabilities. Failure to follow these instructions may result in serious injury or death.

• **DO NOT** overtighten the hardware. **DO NOT** use a socket wrench. This can lead to structural damage and may negatively affect the performance of your stand. Failure to follow these instructions may result in serious injury or death.

• All photos are taken from the front view unless otherwise noted.

• In most cases, bolts come with two nylon washers. One washer will be placed against the bolt head the other washer will be placed against the nut.

CUSTOMER SERVICE DEPARTMENT 1-866-972-6168

PRIMALVANTAGE.COM/FIELD-STREAM
1. Attach each Platform Support H to the BOTTOM of Foot Platform D using 2-M8x55mm.

2. Place Footrest O between the ends of Foot Platform D. Insert the bushing from 1-M8x90mm Bolt between the Foot Platform D and Footrest O. Insert the bolt through the footrest, through the Foot Platform then through the Top Ladder Section A (See Right Side Closeup). Insert the bolt and one washer through the footrest, insert the bushing into the foot platform, then insert the bolt through the foot platform, then through the ladder. Insert the last washer onto the bolt and secure with the nut.

3. Insert Left Handle Rail F and Right Handle Rail G over Top Ladder Section A. Attach by using 1-M6x45mm Bolt. Make sure that the flat side of each Handle Rail is facing towards the inside of the stand.

4. Attach Platform Support H to the INSIDE of each Handle Rail using 1-M8x70mm Bolt on each side.
5. Attach Tree Connection Brace E to the TOP of Handle Rails using **2-M8x70mm bolts** on each side.

6. Attach Seat Platform C to the welded brackets on each Handle Rail F and G using **1-M8x45mm Bolt** on each side.

(See Closeup for proper installation order).

Insert the bolt and one washer through the bracket of the handle rail. Insert the bushing into the seat platform, then insert the bolt through the seat platform. Insert the last washer onto the bolt and secure with the nut.

Right Side Closeup
Attach Arm Rest Cover to each Armrest L. Note where the holes are located on the armrests.

Slide Shooting Rail Bracket P onto each armrest. Attach Shooting Rail Knob Q to Shooting Rail Bracket P.

NOTE: Shooting Rail Knob will be facing the outside of the stand as the Assembled Shooting Rail will rest on top of these knobs.

Attach the front of Armrests L to each side of Handle Rails F and G using 1-M6x70mm Bolt w/Spacer on each side. (See Front Closeup Below).

Attach the rear of Armrests L to each side of Handle Rails F and G using the bolt from Short Knob w/Spacer R to hold the armrest in place for the next step. (See Rear Closeup Below)
9. Insert both Shooting Rail Arms J into Shooting Rail K.

- Insert 1-M6x25mm Bolt through the Shooting Rail and Shooting Rail Arms to secure.
- Attach Shooting Rail Cover W to assembled Shooting Rail.

10. Attach the assembled Shooting Rail to the rear of Armrests L where you used the bolt from Short Knob w/Spacer R. *(See Rear Closeup)*

11. Attach Backrest Cushion N to Seat Cushion M using the hook and loop fasteners. Attach Seat Cushion to Seat Platform C.
1. Position bottom of stand 4-5 feet from base of tree.

2. One person will stand at the base of ladder with his/her foot on bottom rung while holding installation straps. This will prevent tree stand from sliding. Two people will stand at opposite ends of tree stand, facing Platform and slowly walk tree stand upward using rungs of ladder.

3. As tree stand is being raised, the person holding Installation Straps will pull toward themself to take up slack. It will steady and ease the weight of stand on the other two people. Continue walking stand upward, until Tree Contact is resting against the tree.

4. Slide the inner part of the Stabilizer Bar into the outer part. Attach Stabilizer Bar S to the second rung of the Middle Ladder Section with 1 - M8x45mm bolt and 1 wingnut.

   Insert the Adjustment Knob T in the Stabilizer bar at the proper adjustment point to the tree.

**NOTE:** Drawings are for illustration purposes only and may not depict actual product.
**INSTALLATION INSTRUCTIONS PAGE 2**

**OUTPOST 16’ LADDER TREESTAND**

MODEL: HEH00579

---

**STRAP INSTALLATION**

1. Hold Strap as shown.
2. Insert Strap through looped end.
3. Pull Strap to tighten.
4. Use these same instructions to attach the buckle.

---

**BUCKLE INSTRUCTIONS**

1. Hold buckle as shown.
2. Press down on latch and insert strap underneath teeth as shown.
3. Pull strap to desired length.
4. Pull slack to tighten.

---

Move base of ladder toward or away from tree slightly in order to make Platform as parallel to the ground as possible.

Apply your full weight to the first step so it settles into the ground.

---

Attach Buckle Strap U just behind the brace of the inner part of Stabilizer Bar R by following the Strap Installation below. (See Strap Installation Below)

Position the Stabilizer Bar against the tree and secure it by wrapping the strap around the back of the tree once and insert the strap into the buckle. (See Buckle Instructions Below)

---

Cross Installation Straps behind tree. Attach to the top rung of the bottom ladder section. (See Installation Strap Instructions)

---

CUSTOMER SERVICE DEPARTMENT 1-866-972-6168

PRIMALVANTAGE.COM/FIELD-STREAM

©2018 (rev. 2/18)
8. After the ladder stand has been secured to the tree with the installation straps and the stabilizer bar has been securely attached to the tree, continue to have two people hold the ladder, climb cautiously up to the platform. Once you reach the top, **IMMEDIATELY ATTACH YOUR SAFETY HARNESS TO THE TREE.** Keep the tether strap above your head.

9. Cautiously climb to the top of the treestand. Wrap the strap of the ratchet around the back of the tree once and thread through the ratchet. **(See Detailed Ratchet Instructions Below)**

### Detailed Ratchet Strap Instructions

1. Open ratchet handle flat and insert end of strap through opening.
2. Pull Strap through opening.
3. Insert end of strap through slot in ratchet wheel.
4. Ratchet handle back and forth to tighten strap.
5. After strap is tight, close handle to the locket position.
6. To release tension, push spring loaded retaining lock and simultaneously pull on strap.

### Warning

- **Stabilizer Bar and Installation Straps MUST be secured prior climbing the Ladder Stand. Failure to comply may result in serious injury or death.**
- **DO NOT climb ladder without Stabilizer Bar or Installation Straps installed. Serious injury or death may occur if Stabilizer Bar and Installation Straps are not installed.**
1. Place looped end of strap under platform.
2. Insert end of strap through the loop.
3. Pull to tighten. Continue with these steps to install the other strap on the other side of the platform.
4. Place loose end of strap with clip, under the top rung of the bottom ladder section.
5. Insert the strap through Slot 1 on the clip.
6. Insert the strap through the Slot 2 with the teeth.
7. Pull strap to tighten.
8. Slide the buckles out to the sides to create tension on the straps.

**WARNING**
DO NOT sit on seat platform until the ratchet and installation straps have been secured.
You **MUST** follow these instructions prior to installation

1. Place looped end of Ratchet under platform.
2. Insert Ratchet through loop.
3. Pull to tighten.
4. Place looped end of strap under platform.
5. Insert strap through loop.
6. Pull to tighten.

**DETAILED RATCHET STRAP INSTRUCTIONS**

1. Open ratchet handle flat and insert end of strap through opening.
2. Pull Strap through opening.
3. Insert end of strap through slot in ratchet wheel.
4. Ratchet handle back and forth to tighten strap.
5. After strap is tight, close handle to the locket position.
6. To release tension, push spring loaded retaining lock and simultaneously pull on strap.
