SAFETY MUST BE YOUR FIRST PRIORITY WITH THIS PRODUCT

MODEL: HEH01293
STEALTH STEEL CLIMBER

- Always Wear a Safety Harness with this Product
- Practice Using at Ground Level
- Weight Limit: 300 lbs.
- Tree Size: 9"-18" diameter

Instruction and Safety Manual

WARNING
Every year serious injury and death can occur from hunting related accidents. To ensure your safety, please COMPLETELY read and follow this safety manual and ALL warning labels BEFORE assembling, installing or utilizing this product.

DO NOT USE THIS PRODUCT BEFORE FULLY UNDERSTANDING ALL SAFETY WARNINGS AND INSTRUCTIONS. IF YOU HAVE QUESTIONS, ARE UNSURE ABOUT ANY INFORMATION OR NEED ADDITIONAL INFORMATION CONCERNING YOUR PRODUCT, CONTACT OUR CUSTOMER SERVICE DEPARTMENT AT 1-866-972-6168 OR VISIT PRIMALVANTAGE.COM/FIELD-STREAM. KEEP AND MAINTAIN THIS SAFETY AND INSTRUCTION MANUAL IN A SAFE LOCATION FOR FUTURE REFERENCE.

Distributed by Primal Vantage Company Inc., 2407 W. Euclid Ave., Littleton, CO 80120

SAFETY MUST BE YOUR FIRST PRIORITY WITH THIS PRODUCT
Please read the following instruction manual and warnings labels completely before utilizing this product. Failure to understand and execute the instructions and warnings may result in serious injury or death. In the event of an accident, have a plan for rescue, including the use of devices that may be easily reached while suspended. NEVER hunt without a rescue plan.

ALWAYS read and understand all warnings and instructions. Watch the enclosed DVD in its entirety before doing anything with this product including assembly, installation, and wearing etc. before each use of this product. Failure to read and understand all warnings and instructions and DVD material may result in serious injury or death. Contact a Customer Service Representative with any questions you may have.

NEVER exceed weight limit of 300 lbs. DO NOT use if your combined weight with all of your hunting gear and any accessories exceeds 300 lbs. Use of tree stand over the weight limit may result in serious injury or death.

DO NOT use this tree stand while under the influence of alcohol, medication or any illegal substances. Use of tree stand while under the influence of any of these substances may result in serious injury or death.

NEVER use this treestand during inclement weather. DO NOT use tree stand during thunderstorms, snowstorms, hurricanes, tornadoes or any other weather conditions that include (but not limited to) lightning, icy conditions, or high winds that could create slippery or dangerous situations.

NEVER use treestand If you are feeling ill, nauseous, or dizzy. Physical ailments can reduce your ability to safely install, utilize, and remove your treestand. Please consult a physician prior to use.

NEVER use this tree stand if you have a history of health problems such as (but not limited to) heart problems, back problems, high blood pressure, impaired vision, equilibrium impairments, are afraid of heights, have been advised by a doctor or physician not to climb. If you are not physically fit, well rested, and alert, or if you have any other physical or mental condition that would impair your ability to properly use this treestand.

NEVER use treestand on a tree that is dead, leaning, diseased, loose barked or on a utility pole as the tree may fall, break, or uproot and may result in serious injury or death. NEVER rely on a tree branch for support. NEVER jump or bounce on a treestand to seat it to the tree.

NEVER transport any of your equipment with yourself while ascending or descending the tree. You will need to have two hands free during ascending and descending for safety. Use a haul line to pull up your firearm (unloaded, chamber opened with safety lock engaged, barrel facing towards the ground), bows, arrows, knives or any other equipment to your treestand once you have reached your desired hunting height. ONLY pull up hunting equipment after the tree stand has been secured to the tree and after you and your harness have been secured to the tree. Prior to descending, lower your equipment on the opposite side of the tree from which you are climbing. Make sure that the unloaded firearm’s safety lock is engaged and the gun barrel is pointing towards the ground.

ALWAYS inform someone of your hunting location, where the treestand will be located and the expected duration of the hunt. ALWAYS hunt with a plan and a buddy. Before you leave home, let others know your exact location, when you plan to return and who is with you.

ALWAYS carry emergency signal devices such as a cell phone, walkie-talkie, whistle, signal flare, PLD (personal location device) and flashlight with you at all times and within reach even while you are suspended in your harness. Watch for changing weather conditions. In the event of an accident, remain calm and seek help immediately.

ALWAYS inspect the tree stand and the Fall Arrest System (Harness) for signs of wear or damage BEFORE each use. Also inspect to ensure that nuts and bolts are secure. Pay special attention to the harness and straps, guaranteeing that nothing has been frayed or severed. Destroy all products that cannot be repaired by the manufacturer. Contact a Customer Service Representative for replacement parts. The Fall Arrest System MUST be discarded and replaced after a fall has occurred. DO NOT store treestand or safety harness outdoors when not in use.

DO NOT ATTACH YOUR FULL BODY HARNESS TO YOUR TREESTAND.

DO NOT modify or alter your tree stand. Improper installation or adjustment may cause serious injury or death. Remove all contents from box. Inspect for any damaged or missing parts. If any parts are missing or damaged, you must only use certified replacement parts. Using any other replacement parts will void product warranty. THERE ARE NO EXTRA PARTS. All parts MUST be used to ensure the safety of you and your stand. If you think parts are missing or damaged, STOP IMMEDIATELY and contact our Customer Service Department. Using the tree stand with missing or damaged parts may result in serious injury or death. DO NOT return this product to the retailer. Contact a Customer Service Representative if you have any missing, damaged or extra parts.

PRACTICE installing, adjusting and using your tree stand at ground level prior to using it at an elevated position. Familiarize yourself with the use of climbers by practicing at ground level before using in a hunting environment.

ALWAYS keep Instructions (written and video) in a safe place and review before each use. It is the responsibility of the treestand owner to furnish the complete instructions to anyone who borrows or purchases the treestand from you. A safe treestand hunting video has been included. Please view it in its entirety prior to using this product.

NEVER use this treestand for any use other than hunting. Our treestands are designed for hunter’s to wear a Full Body Harness. If you are not completely comfortable and confident with your ability to safely install, ascend, hunt and descend using a Full Body Safety Harness and this treestand, DO NOT PROCEED.

NEVER use this treestand for trimming trees.

NEVER fall asleep in your stand as you may fall out resulting in serious injury or death.

ALWAYS be sure to retighten all bolts BEFORE each new use of treestand.
TREESTAND SAFETY WARNINGS

NEVER adjust your stand while in use. ALWAYS ensure that you and your treestand are safely secured to a healthy tree. Your tree stand MUST be attached tightly to the tree and secured in place. If the stand is not secure, it may shift while in use, resulting in serious injury or death.

DO NOT leave your treestand outside since weather and animals may cause damage. Tree growth can also cause stress and damage straps and buckles. It must be stored inside, free of moisture, when not in use.

NEVER wear jewelry or loose fitting clothing, which can cause hazardous conditions. Clothing may be caught in your equipment and cause you to fall. You must always wear non-slip or rubber boots. Shoelaces must be tucked into your boots. Rings and necklaces MUST NOT be worn.

NEVER use this treestand with a second person. The treestand is designed for use by ONE person.

NEVER let children use this treestand without adult supervision. This treestand is not a toy. No one under the age of 18 should attempt to use this product without direct adult supervision.

DO NOT use tree stand if any nuts or bolts or parts are loose, bent, or crooked.

ALWAYS know your physical limitations. Don’t take chances. If you start thinking about how high you are, don’t go any higher. Instead, choose a minimum height that will allow for safe, effective and comfortable hunting.

ALWAYS wear a Fall Arrest System (FAS) (Harness) consisting of a full body safety harness after leaving the ground. A Full Body Harness that meets TMA/ASTM standards MUST always be connected to yourself and the tree during ascending, hunting, and descending. You MUST stay connected at all times after leaving the ground while using climbing and hang-on treestands. Single safety belts and chest harnesses are no longer allowed and should NEVER be used. If you are not wearing a Full Body Harness properly attached to the tree, that is protecting you from a fall. DO NOT leave the ground. Failure to wear your Full Body Harness may result in serious injury or death. Be aware that falls can occur anytime after leaving the ground.

ALWAYS read and understand the manufacturer’s Warnings, expiration date (if applicable) and instructions on how to use and how to properly adjust the harness. Practice the use of a full body safety harness at ground level in the presence of a responsible adult to experience the feeling of hanging suspended before using in a hunting environment. Failure to follow harness instructions may result in not being able to return to the stand and being suspended in a harness after a fall, or serious injury or possibly death. If the hunting location is unknown by anyone and communication efforts are unsuccessful, you MUST stay connected at all times after leaving the ground while using climbing and hang-on treestands. Single safety belts and chest harnesses are no longer allowed and should NEVER be used. If you are not wearing a Full Body Harness properly attached to the tree, that is protecting you from a fall.

ALWAYS have a suspension relief device on your person and readily accessible while using a harness. These devices allow the user to relieve the load on the lower extremities if suspended in a harness and help maintain circulation in the legs, mitigate suspension trauma (blood pooling) or allow descent to the ground. Several optional products/systems are available that offer self-recovery or self-extraction from a fall when suspended in a harness. Some systems automatically descend the user while others allow user control. One of these products/systems can be considered for use as an additional safety precaution against prolonged suspension and suspension trauma. Be sure to follow the manufacturers’ instructions on the safe use of these products/systems.

Always be connected to yourself and the tree during ascending, hunting and descending. You MUST stay connected at all times after leaving the ground while using climbing and hang-on treestands. Single safety belts and chest harnesses are no longer allowed and should NEVER be used. If you are not wearing a Full Body Harness properly attached to the tree, that is protecting you from a fall.

ALWAYS have a suspension relief device on your person and readily accessible while using a harness. These devices allow the user to relieve the load on the lower extremities if suspended in a harness and help maintain circulation in the legs, mitigate suspension trauma (blood pooling) or allow descent to the ground. Several optional products/systems are available that offer self-recovery or self-extraction from a fall when suspended in a harness. Some systems automatically descend the user while others allow user control. One of these products/systems can be considered for use as an additional safety precaution against prolonged suspension and suspension trauma. Be sure to follow the manufacturers’ instructions on the safe use of these products/systems.

Hunt from the ground when self-recovery escape is absent. There is time to make a correct decision on what action to take if a fall occurs while wearing a full body harness. It is important to remember “DO NOT PANIC.” Remain calm and implement your practiced rescue, relief and recovery plan.

NEVER allow the tether strap to get under your chin or around your neck. The length of the harness tether MUST be minimized at all times. It should be adjusted so that it is above the head with no slack (snug) in the sitting position and you should have the minimum amount of slack possible when climbing.

NEVER lean out from the treestand for any reason.

The initial angle of the climber at ground level, MUST allow for the decrease in tree diameter while ascending by tilting slightly upward.

While climbing, adjustments to the harness tether should be frequent and coordinated with tree stand movement to maintain the least amount of slack in the tether that will allow for climbing.

NEVER remove any safety warning stickers from this product.

SAFETY MUST be your first priority during the use of this product.
CHOOSING A SAFE TREE

• **ALWAYS** thoroughly inspect the tree before installing your product. **DO NOT** install your TREE/LADDER STAND onto any dead or unsafe tree, telephone or utility pole, structural column, or man-made structure. Doing so may result in serious injury or death.

• **ALWAYS** select the proper tree for use with your TREE/LADDER STAND. Select a live straight tree that fits within size limits recommended (minimum tree diameter must be no less than 9 inches and maximum of 18 inches.). **DO NOT** rely on a branch for support.

• **DO NOT** select a tree in the dark or choose a tree in close proximity to a fence. You must not have any stumps or rocks beneath your tree.

• **NEVER** use TREE/LADDER STAND on a tree that is dead, diseased, leaning or on wet and uneven ground as the tree may fall, break or uproot.

• Your tree must not be wet, icy or slippery or on wet, swampy, or loose ground that allows the tree to be unstable. Check the ground under TREE/LADDER STAND to ensure it is firm and level.

• Be sure you have a level stand platform. Your tree must not lean or have any irregular shape.

• Tree must not have any loose or scaly bark, excessive vines, nails, screws, or any other sharp objects protruding that may sever webbing on product. Any surrounding trees must not lean or have dead limbs that may fall onto you or your product.

• **NEVER HURRY!! HURRYING CAUSES ACCIDENTS!!** While climbing a TREE/LADDER STAND, make slow, even movements no more that ten to twelve inches at a time. Make sure you have proper contact with tree and/or TREE/LADDER STAND every time you move. On ladder tree stand, **ALWAYS** maintain three points of contact with each step and **ALWAYS** lean forward as you climb.

• Several treestands are equipped with a footrest, armrests and/or shooting rail. Neither the footrest, armrests nor the shooting rail have been designed to support a user’s weight. Under NO circumstances should you place more than fifteen (15) pounds of weight on these structures. Doing so will put the user in serious risk of injury or death.

PROPER CARE AND MAINTENANCE:

• Inspection for defects (damage, rot, corrosion, cracks, freezing, excessive heat, etc.) before every use is required. Do not use if damage is detected or suspected.

• We recommend replacing all hardware/cables/nuts/bolts/clips on your tree stand every two (2) years or sooner if inspection finds it necessary. Use only Primal Vantage approved replacement straps and parts. Use of any other straps or parts, will be viewed as a modification to the product. Any modification will void the warranties and relieve Primal Vantage from all liabilities. Failure to follow these instructions may result in serious injury or death.

• **DO NOT** overtighten the hardware. **DO NOT** use a socket wrench. This can lead to structural damage and may negatively affect the performance of your stand. Failure to follow these instructions may result in serious injury or death.

• All photos are taken from the front view unless otherwise noted.

• In most cases, bolts come with two nylon washers. One washer will be placed against the bolt head and the other washer will be placed against the nut.

</tbody>
</table>
1. Insert 1-M8x75mm bolt through the bottom of Climbing Aid and 1-M8x75mm bolt through the bottom of Foot Platform.

2. Lift railing and insert frame support through attached bolt.

3. Thread T-knob on bolt.

4. Insert 1-M6 Quickclip through frame support and welded tab to secure frame in place.

5. Insert Shooting Rail into Climbing Aid. Adjust Shooting Rail to proper length and insert 2-M6 Quickclips through shooting rail and frame. Attach Shooting Rail Cover to Shooting Rail.

6. See Backpack Strap Instructions to attach Backpack Straps to the bottom of Foot Platform.
7. Insert one end of Cable E into the Foot Platform Rail. Insert Notched Quickclip H into the rail and through the eyelet on the cable. Wrap the cable around the back of the tree and insert the other cable into the opposite railing of the Foot Platform. Secure with Notched Quickclip J.

8. Insert one end of Cable E into the Climbing Aid Rail. Insert 1 - M8 Quickclip H into the rail and through the eyelet on the cable. Wrap the cable around the back of the tree and insert the other cable into the opposite railing of the Climbing Aid. Secure with 1 - M6 Quickclip H.

9. Tie Rope K to Climbing Aid A at the rear support and the other end to Foot Platform B at the rear support. DO NOT tie around the teeth.
Have both top and bottom platforms angled down towards base of tree to compensate for a smaller tree diameter at desired hunting height. At ground level, apply pressure to both platforms to ensure they have an appropriate angle on the tree and that the T-knobs are properly installed.

CAUTIOUSLY put your weight on the foot platform. The additional weight will create tension on the cables.

At ground level, apply pressure to both platforms to ensure they have an appropriate angle on the tree and that the T-knobs are properly installed.

At ground level, step cautiously onto the foot platform. Attach your harness to the tree (as per harness manufacturer’s instructions). Standing on the foot platform facing the tree, insert your feet into foot stirrups N. Tighten straps as needed. Secure bungee strap around your heels to assist in keeping feet in foot straps.
1. Turn Foot Platform over, insert the looped ends of the backpack straps up through the rear frame of the platform. (See Fig. 1)

2. Insert the other end of the strap back through the loop and pull tight. (See Fig. 2 and 3)

3. Insert the loose end of the strap through the front of the platform. (See Fig. 4)

4. Insert the strap end through the slot with the teeth on the clip. (See Fig. 5)

5. Insert the strap end back through the second slot on the clip. (See Fig. 6)

6. Pull to tighten. (See Fig. 7)

7. Follow steps 1-6 for the other Backpack Strap and your straps should look like Fig. 8.
CLIMBING INSTRUCTIONS

BEFORE BEGINNING TO CLIMB

- Check that your harness is secure, that cables are properly quick clipped, and that the seat straps on your seat section are off to the side, so that they do not obstruct the cable connecting to the tree in any way while climbing.

- Practice at ground level with your Full Body Harness.

- Familiarize yourself with this product’s function so you feel comfortable with the climbing procedure.

1. Sit on shooting rest and lift your feet to raise foot platform. Push down to set foot platform in raised position. **FIG.1**

2. Stand and lift up on seat platform to adjust it to a comfortable level. Push down to set seat platform in raised position. Raise your harness tether to take up the slack. **FIG. 2**

3. Again, sit on shooting rest and lift you feet to raise foot platform. Push down to set foot platform in raised position. **FIG.1**

4. To continue climbing up tree, repeat steps 1 through 3, continuously adjusting your harness to keep strap above your head with minimum slack.

5. When you have reached the desired height to hunt from, wrap each Buckle Strap **O** around each cable in the front of the tree. **FIG.3** Thread the strap through the buckle and pull tight. (See below Buckle Instructions). The straps should be in front of the tree and **NOT** wrapped around the tree. Pull excess slack through buckle, this will lock the platforms into place on the tree.

6. Carefully remove one foot at a time from the foot straps. Slowly turn around never taking both feet off of the foot platform, you **MUST ALWAYS** have weight pressed on the foot platform.

7. Sit on the seat cushion, and if any adjustment needs to be made to the seat placement, you **MUST** climb back to the ground and adjust on the ground. Using a safe hoist/lift system, raise your unloaded weapon.

8. To climb back down the tree, reverse the process, always ensuring you are constantly adjusting your harness tether as you move.

BUCKLE INSTRUCTIONS

1. Hold buckle as shown.

2. Press down on latch and insert strap underneath teeth as shown.

3. Pull strap to desired length.

4. Pull slack to tighten.

NOTE: Images used are for demonstration purposes only and may not depict the actual product.
ALWAYS read and understand all warnings and instructions before each use of this product. Failure to read and understand all warnings and instructions may result in serious injury or death.

ALWAYS inspect the tree stand for signs of wear or damage BEFORE each use. Also inspect to ensure that nuts and bolts are secure and straps are not frayed, worn, or broken.

NEVER exceed weight limit of 300 lbs. DO NOT use if your combined weight with all your hunting gear and any accessories exceeds 300 lbs. Use of tree stand over the weight limit may result in serious injury or death.

ALWAYS inspect the tree stand for signs of wear or damage BEFORE each use. Also inspect to ensure that nuts and bolts are secure and straps are not frayed, worn, or broken.

ALWAYS wear a Fall Arrest System (FAS) after leaving the ground. If you are not wearing an FAS that meets ASTM standards, DO NOT leave the ground. Failure to wear an FAS may result in serious injury or death.

DO NOT use this tree stand while under the influence of alcohol, medication, or illegal substances. Use of tree stand while under the influence of any of these substances may result in serious injury or death.

NEVER use this tree stand if you have a history of health problems such as (but not limited to) heart problems, back problems, impaired vision, equilibrium impairments are afraid of heights or have been advised by a doctor not to do any strenuous activity. If you are feeling ill, nauseous, or dizzy DO NOT use this tree stand or if you are not physically fit, well rested and alert. Physical ailments can reduce your ability to safely install, utilize and remove your tree stand.

NEVER use this tree stand during inclement weather such as (but not limited to) thunderstorms, snowstorms, hurricanes, icy conditions, or high winds that could create slippery or dangerous situations.

NEVER use this tree stand on a dead, leaning, loose barked tree or on a utility pole as the tree may fall, break, or uproot and may result in serious injury or death.

ALWAYS make platform level adjustments at ground level.

ALWAYS ensure that the platforms are tilted slightly upward at ground level to allow for the decrease in tree diameter when ascending.

ALWAYS make sure that the straps connecting the top and bottom platforms are secured and at the proper length recommended.

ALWAYS make frequent adjustments to the harness tether, coordinated with tree stand movement to maintain the least amount of slack in the tether that will allow for climbing.

ALWAYS practice at ground level before using in a hunting environment.

DO NOT modify or alter your tree stand.

NEVER remove or deface warning labels.

Manufactured in the year 2018 Primal Vantage Company Inc., 2407 W. Euclid Av e., Littleton, CO 80120 1-866-972-6168
